SITE izagorodnyi.dev

BASED IN Bishkek, Kyrgyzstan

Profile

Front-end developer with over 18 years of experience. I build front-ends of any complexity — from animated promo landing pages to large catalogs and online stores — and take them all the way to a working site: CMS implementation, API integration, build setup. I specialise in accessible interfaces for people with low vision and in promo projects for performance marketing. I care about speed, semantics and clean code.

Experience

Oct 2019 — present

Fhtagn! fhtagn.studio

HTML developer / Front-end developer

Front-end builds for the studio's new clients plus support and improvements for live sites: Vue.js promo mechanics with API integration, company websites, online stores.

Oct 2019 — Jan 2022

Avaho.ru avaho.ru

Front-end developer

Landing pages for a real-estate portal, support and updates for the live site.

Jun 2019 — Apr 2020

Astonia astonia.ru

HTML developer

Fixes and improvements for existing clients, new projects built from scratch.

Apr 2019 — Jun 2020

Rossait rosait.ru

Front-end developer

Front-end builds and support for the company's client sites.

Apr 2019 — May 2020

Bai-Tushum Bank btbmarket.kg

Front-end developer

Complete front-end for the btbmarket.kg online store on OpenCart.

Oct 2015 — Sep 2019

Incentient incentient.com

HTML / JS / CSS developer

Builds for iPad and iPhone, non-standard tasks of high complexity.

Feb 2014 — Aug 2020

Platformaservice platformaservice.com

Front-end developer

Front-end and full maintenance for several of the company's clients, WordPress implementation.

Jul 2008 — Mar 2020

SmartJobBoard smartjobboard.com

Front-end developer

Front-end for every client project on the job-board platform — for over 11 years.

Core skills

- **Markup:** HTML5, CSS3, SCSS/LESS, Flexbox, Grid, BEM, responsive and cross-browser, pixel perfect, email templates
- **JavaScript:** vanilla JS, Vue.js, jQuery, Ajax, GSAP animation, REST APIs
- **Integration:** CMS implementation, templating (Smarty, Blade, Liquid), basic PHP, third-party services and APIs
- **Accessibility and SEO:** low-vision versions, WCAG, semantic markup, SVG, page speed
- **Performance marketing:** promo landing pages, Keitaro tracking, A/B variants, goals and pixels
- **Tools:** Git, Vite, Webpack, Gulp, Figma, Photoshop, Sketch, Jira
